## ARE YOU COMPETITIVE?

Competition is ***extremely*** fierce – the question is: “ARE YOU COMPETITIVE?” Our WST Bootcamp gives you the edge to become a superb investment banker & financial analyst. The leading Wall Street firms already use WST – now you can gain access to the same enthusiastic, hands-on learning.

## BE COMPETITIVE

Regardless of the environment, Wall Street still hires and pays well. Financial services firms are worth only as much as its people, and now, more than ever, competition is **extremely** fierce. The ratio of applicants to open positions have ballooned 5x and the question is: "**ARE YOU COMPETITIVE?**" Even if you get in the door, bonuses range from 0% + pink slip to 400% + promotion. The WST Bootcamp teaches you the knowledge to succeed.

## WST BOOTCAMP

We give you the edge to far exceed your competition - get into the door, keep the job, and advance rigorously. Our comprehensive, 28-hour live class gives you the **most hands-on, non-theoretical training** available to become a superb investment banker and excel in the financial profession.

## OUR COMPETITION

We **bridge the gap** between **real world** experience and the theoretical academic classroom. Our competition simply cannot compete – they **claim** they also bridge that gap whereas our classes are taught by active bankers and professionals who are still executing deals.

## WST ADVANTAGE

Our courses utilize the **same content** we train our entire client list, from the big bulge bracket & boutique investment banks to buy-side asset managers, research firms, commercial banks, private equity and VC firms, hedge funds and others. In addition, we train 9 of the top 10 CFA Institute member societies – we are the local society's **exclusive financial modeling provider** for 8 of the 9.

Last year, WST trained over 12,000 financial professionals worldwide. Being the **only** training entity to offer such advanced content, we have been privileged to retain some of the **most prestigious firms** as clients, including: Bank of America, Capital Group, CIT Group, Citigroup, Credit Suisse, Deutsche Bank, Dow Jones, Fidelity, GE Private Equity, Greenhill, JPMorganChase, Oppenheimer, TD Securities, TIAA-CREF, TPG, World Bank (IFC) and many others.

## WST DIFFERENCE

We teach with enthusiasm, making complex content much easier to understand and apply. Unlike our competition that teaches like a boring college economics lecture, our classes are dynamic, hands-on, and interactive. Like you, we dread reading from slides. More importantly, **we don't just teach you the "what" and "how-to", we focus on the "why" and the nuances and the exceptions to the nuances!**

## COURSE TOPICS

### Advanced Financial Modeling - Core Model

- Build fully integrated IS/BS/CF/Debt in Excel without using the mouse

### Fundamental & Relative Valuation Modeling

- Enterprise Value, leverage, DCF, comps, reference range & football field

### M&A Deal Structuring and Merger Modeling Basics
